

The General Data Protection Regulation (GDPR)

| Our approach to help you

We advise Swiss companies to apply an equivalent compliance level as the European GDPR to be ready for the upcoming Swiss FADP.

REDstone

1. Gap analysis

Thanks to our methodology comprised of **13 domains distributed in 3 groups**, we quickly reach an understanding of your **main risks and gaps** with the GDPR during dedicated **Workshops** with the project's main stakeholders.

We then create a **roadmap** for a pragmatic compliance.

2. Compliance program

Redstone Consulting, and its partners will be able to help you close the gaps identified in phase 1.

Legal

- Writing and validation of data protection notices
- Identification of data processing legal basis
- Third party and supplier contract review
- General conditions update
- Implementation of a data transfer strategy

Governance

- Compliance program and project management
- Defining strategy and governance for data protection
- Writing of procedures and policies
- Training and awareness
- Creating an inventory of processing activities
- Data lifecycle and retention processes evaluation and creation
- Implementation of best practices for the management of individuals' rights
- Data privacy risk assessments and process definition
- Resource allocation for executing the DPO's tasks

Cybersecurity

- Anonymisation, pseudonymisation, data encryption
- Implementation of technical solutions for data protection
- Draft and implementation of a data breach/incident response process

3. Compliance maintenance

Our team offers you a **External DPO services** to partially or fully support you with data protection and compliance with the GDPR.

We also propose an **annual audit** of your compliance in order to confirm that the previously identified as well as new gaps are addressed.
