

Redstone Flexible Resources (RFR)

A daily support

We are able to bring you strong expertise in data protection, cybersecurity and IT project management. Use our resources to support your business in ways that best suit your needs and specificities.

1. Our flexible resources service

Take advantage of the on-site presence of one or more Redstone employees, at the desired percentage of presence for a renewable minimum duration.

The resources will benefit from our experience in several areas, such as regulatory compliance and information technology and cybersecurity. Depending on your needs, **we will propose skills in IT project management, data protection and/or cybersecurity.**

Hire one person and enjoy all our skills on demand!

This solution will allow you **to outsource certain services and thus absorb your costs in operating expenses.** In addition, you keep total flexibility to increase or decrease the percentage of attendance at each renewal!

2. Our different resources

- Compliance with data protection laws
- Maintaining compliance
- Training & awareness
- Regulatory watch

- Definition of a cybersecurity strategy
- Establishment of processes
- Project management cyber
- Training & awareness
